**GPU POWER CONNECTOR INSTALLATION**

1. Align the bundled multi 8-pin-to-12VHPWR cable to the power socket on the GPU.

2. Insert the bundled multi 8-pin-to-12VHPWR cable to the power socket on the GPU.

3. Confirm that the bundled multi 8-pin-to-12VHPWR cable is fully seated into the GPU power socket.

4. Connect the 8-pin power connectors from the power supply into the available female connections on the bundled power adapter.

5. After the installation and cable management of the bundled multi 8-pin-to-12VHPWR cable to the GPU, double check the power connection is still fully seated to ensure it has not shifted.
